Columbia Returns Home Safely

The Space Shuttle Columbia landed safely at KSC Tuesday afternoon after nearly four days in space. The originally scheduled 16-day mission was shortened due to problems with an orbiter fuel cell. A reflight of the mission has been requested. According to Shuttle Manager Tommy Holloway, options are being evaluated, and the option that appears most promising is adding a flight in July and reflying the mission for the full 16-day duration.

Marshall Open House on May 3 Will Showcase Center and Roles

Career Training Seminar Thurs.

Marshall's Career Transition Assistance Program Center will hold a seminar Thursday for Marshall employees looking for smart strategies for out-of-state relocation. The seminar will be held 1 - 3:30 p.m., in Bldg. 4723, Room 115.

Marshall SSL Scientists Selected To Conduct Microgravity Research

NASA has announced the results of its solicitation for new research in the area microgravity biotechnology. Three studies submitted by scientists in Marshall's Space Sciences Lab were selected. Scientists who will conduct the investigations, along with colleagues of the Alliance for Microgravity Materials Science and Applications, are Dr. Marc L. Pusey, Dr. Krishnan Chittur and Dr. Alexander Chernov. A total of 36 investigations were selected.
